Python Developer with 2.5+ years specializing in backend systems and RESTful API development using Django and FastAPI. Built scalable APIs for a US real estate platform, implementing custom OpenAPI/Swagger documentation and JWT authentication. Experienced in PostgreSQL database design, Redis caching, and Docker containerization. Integrated third-party APIs including payment gateways and mapping services. Currently collaborating with AI teams at Outlier on LLM training data optimization and code quality enhancement while expanding expertise in API gateway design and microservices architecture.

PROFESSIONAL EXPERIENCE

Coding Contributor - AI Training

Jun 2025 – Present

Outlier AI | Remote (Part-time, 10+ hours / week)

- Collaborate with AI development teams to enhance generative AI model capabilities.
- Apply expertise in Python, Java, JavaScript, and Docker to support AI training initiatives.
- Contribute to code quality improvements and technical documentation for LLM development.

Junior Backend Developer

Mar 2024 – Dec 2024

Cloud Development and Data Analytics | Dhaka, Bangladesh

- Built and maintained RESTful APIs using Django and aiohttp for high-performance backend systems.
- Integrated multiple third-party APIs to extend functionality and improve user experience.
- Containerized applications using Docker for efficient deployment and scalability.
- Worked closely with frontend teams to design seamless data flows and API contracts.

Python Developer Intern

Oct 2023 – Mar 2024

MicroAppValley | Dhaka, Bangladesh

- Assisted in backend development using Python and Django for web applications.
- Gained hands-on experience with Django templates and modern CSS frameworks like TailwindCSS.

TECHNICAL PROJECTS

GitScope Bot - GitHub Analytics Telegram Bot

[View on GitHub](#)

A Telegram bot that provides instant access to GitHub analytics, allowing users to explore public profiles, repository statistics, and discover trending projects by programming language through conversational commands.

Tech: Python, Asyncio, Python Telegram Bot, Github API

Bondhu AI - AI-Powered Educational Assistant Platform

[View on GitHub](#)

A comprehensive educational platform that leverages AI to provide personalized learning experiences through PDF-based chat rooms, automated quiz generation, and real-time progress tracking for students, teachers, and parents.(In Development)

Tech: FastAPI, Flutter, Redis, PostgreSQL, pgvector, OpenAI, Docker

Mitnity: Event Management SaaS

[View on GitHub](#)

Developing multi-tenant event platform with dynamic subdomains. Currently supports event creation, ticketing, and user management features.

Tech: Django, Docker, PostgreSQL, Redis, Celery, Vue.js, DRF, TailwindCSS

TECHNICAL SKILLS

<code></></code> Languages	: Python • JavaScript • Html/Css • SQL
⚙️ Backend	: Django • Django REST Framework • FastAPI • Flask • aiohttp
🗄️ Databases	: PostgreSQL • MongoDB • Redis • Django ORM
🔗 API Design	: RestAPI • GraphQL • OpenAPI/Swagger • Stoplight Studio • JWT/OAuth • Postman
🛠️ Tools	: Docker • Git • Linux • Celery • Locust

EDUCATION & CERTIFICATIONS

Bachelor of Science in Psychology

2018 – 2023

Tejgaon College, University of Dhaka, Bangladesh

Professional Certifications

- IBM Data Science Professional Certificate – Coursera (2023) [View Certificate](#)
- IBM Data Analyst Professional Certificate – Coursera (2023) [View Certificate](#)

Currently Learning: API Gateway Design • Langchain • HuggingFace • gRPC • Kubernetes
